- Developed professional skills in Excel, data visualization, and stakeholder reporting

Projects

Simon Says Game

Demo [🔗](#)

- A memory-based game inspired by the classic “Simon Says”
- Developed an interactive browser-based game using HTML, CSS, and JavaScript
- Implemented logic for randomly generated sequences and user input tracking
- Designed intuitive UI with real-time feedback, sound effects, and score tracking
- Focused on enhancing user experience through responsive design and dynamic difficulty levels
- Strengthened JavaScript skills by managing event listeners, timers, and DOM manipulation
- Tools Used: HTML, CSS, JavaScript

Restaurant Website

Demo [🔗](#)

- A static website showcasing a fictional restaurant’s brand and offerings
- Built a responsive, multi-page website using pure HTML and CSS to highlight menu items, location, and contact details
- Designed a clean and engaging user interface with consistent branding and layout
- Applied semantic HTML for accessibility and SEO-friendly structure
- Styled components using custom CSS with attention to typography, color schemes, and layout responsiveness
- Gained hands-on experience in front-end fundamentals and web design best practices
- Tools Used: HTML, CSS

Spotify Clone

Demo [🔗](#)

- Built a static clone of the Spotify web interface using only HTML and CSS
- Replicated core UI components: sidebar navigation, music player controls, album covers, and layout structure
- Implemented responsive design techniques to ensure compatibility across screen sizes
- Applied Flexbox and Grid for precise element alignment and modern layout flow
- Strengthened front-end development skills and deepened understanding of layout, styling, and UI consistency
- Tools Used: HTML, CSS

Skills

Languages: HTML, CSS, JavaScript, C, JAVA, Python

Tools/Technologies: Git, GitHub, VS Code, Responsive Web Design, DOM Manipulation
